The Strong *and* Flexible EdgeFile.

EdgeFile™ Heat-Treated Fire-Wire™ NiTi delivers two to eight times the strength of leading files, based on internal cyclic fatigue testing. Additionally, the "canal contouring technology" allows the file to follow the anatomy of the canal reducing the risk of ledging, transportation and perforation.

"The best way to predict the future of Endodontics is to invent it. This is our mission at Edge Endo. We are changing Endodontics by bringing the best technology to you at half the cost."

"They're a winner. I love 'em! And, I'll save $25,000 this year."

– DR. ROBERT LESNIAK, DDS
